

Powerlink Products have ensured wherever possible that our products are compliant to the RoHS Directive 2002/95/EC.

The **RoHS Directive 2002/95/EC** restricts the amount of six environmentally hazardous substances found in electrical and electronic equipment.

As a result all products are manufactured using raw materials that do not contain any of the restricted substances referred to in Article 4(1) of the **RoHS Directive 2002/95/EC** at concentration levels in excess of those permitted under the **RoHS Directive 2002/95/EC**, or up to levels allowed in excess of these concentrations by the Annex to the **RoHS Directive 2002/95/EC**

Due Diligence

Powerlink Products will make every appropriate effort to ensure compliance regarding maximum concentration values for substances as defined in **RoHS Directive 2002/95/EC**. However, companies that manufacture Electrical or Electronic Equipment are obliged to ensure compliance with **RoHS Directive 2002/95/EC** and must bear the responsibility of ensuring that their obligations regarding the appropriate laws and legislation are observed. Powerlink Products makes no warranties, expressed or implied and assumes no third party liability in connection with any use of the information in its statements of compliance.
